

HAPPY HEALTHY HORMONES

Basic Info on Homeopathy and Hormone Rejuvenation

<http://www.donnacrow.com>

Hormone replacement therapy (HRT), whether natural or synthetic, is based on the incorrect assumption that your body becomes incapable of producing appropriate amounts of hormones simply because we reach a certain age. Your body does alter its hormone production as you pass through the stages of your life, but hormone problems are a function of how healthy you are, not how old you are. This myopic viewpoint has caused thousands of deaths from cancer.

Natural hormone usage has grown since synthetic HRT has been deemed toxic and a potential cancer risk. Millions of women are now using synthetic, natural “plant derived” and synthesized “bio-identical” hormones. The problem for the consumer is education about product safety. Natural progesterone, estrogen, and wild yam creams can cause an extreme toxicity in hormone levels, as seen in over 1000 saliva tests, before and after usage. Therefore, if a woman’s normal progesterone range is 100 and she is using a progesterone cream, the level may jump to 6,500 and become a toxic burden to the liver and immune system.

Any hormone replacement, whether it is natural or synthetic, actually causes the body to slow down the production of its own natural hormones, including melatonin, DHEA, progesterone and human growth hormone. HRT does not treat the cause of any problem, it only addresses and perpetuates the symptoms.

Moreover, life-threatening symptoms can be easily camouflaged by using natural hormones. If we use natural hormones, it is similar to placing a band-aid on the health concern instead of treating the cause. A patient with undiagnosed hepatitis C can easily have hormonal symptoms due to the fact that the liver conjugates hormones and the adrenals are stressed. If we use hormones to address the

symptoms, the body may stop communicating the symptoms, which could point the practitioner in the wrong direction and an incorrect diagnosis - the underlying hepatitis C.

Since women are no longer willing to accept the risks associated with synthetic hormones and are searching for safer alternative, they are vulnerable to the marketing concepts of natural hormone replacement being portrayed as a safe answer to HRT. They are NOT!

So what can women and men do who find their hormonal system in need of rejuvenation? Enter: Homeopathic Hormone Rejuvenation. Homeopathic Hormone Rejuvenation products stimulate the body to produce its own hormones in healthy levels. The benefits are quite profound.

Hormones are essentially our fountain of youth. When we have healthy hormone levels the body is better able to heal itself. Infections, for instance, are more easily dealt with by the body when we have healthy hormone levels. A strong endocrine system enables the body to do a profound amount of healing. Lagging hormones makes older people much more vulnerable to illness. The endocrine system and the immune system work hand in hand to keep us healthy. Many people understand the need to support a healthy immune system; we also need to support our endocrine system if we desire optimum health.

Homeopathic remedies can improve progesterone uptake and metabolism. They also do not interfere with the normal shift from progesterone dominance to estrogen dominance during the month. Another fascinating factor in healing hormonal conditions with homeopathy is that homeopathics do not have any side effects because they contain only minute amounts of medical substances.

However, even though there are only trace amounts of therapeutic ingredients in homeopathics, clinical experience with these medicines shows that the infinitesimal dosages they offer works on unconscious people, infants, and animals, thus eliminating any possibility of placebo effect.

Homeopathy can be utilized effectively for hormone rejuvenation by stimulating production of natural hormones in the human body. The homeopathic substances that are

used to treat endocrine and hormonal symptoms may be made from botanical and mineral substances in addition to healthy tissue or secretions of the body such as hormones.

Examples of homeopathic ingredients include cheladonium, which can treat liver congestion; sepia, which can treat hot flashes; and sulphur, which can treat delayed menses and hot flashes.

Whether applied topically or taken orally, homeopathic remedies can stimulate a healing response in the treated organ, thus stimulating the normal functions of that organ.

Homeopathy is not addictive and it does not replace any innate function of the body. It is truly healing medicine, body, mind, and spirit. Use it as directed on the product label and be sure to adjust the dosage (lower it) as the patient starts to feel better.

Any claims that we make are derived from both the homeopathic material medica, and our research. There are many homeopathic material medica's available. All of them have claims based on millions of patient's results over the past 200 years. All of our homeopathic formulas are registered with the FDA.

Our research includes over 13,000 third party (before and after) Saliva Test results. This research indicates toxic levels of hormones and side effects from patients using hormone replacement therapy, which includes synthetic, bio-identical, naturally derived botanical phyto-estrogens, and progesterone products sold in health food stores. Moreover, we have also seen toxicity symptoms from using DHEA and hormone precursors.

The Basic Products

Oral Products:

Endo Pure Estro

Endo Pure Pro

Endo Pure Testos - Female

Endo Pure Testos - Male

Dosage is 5 drops under the tongue: 1-3 times a day on empty stomach (1/2 hr before or after meals or drinking, or tooth brushing, or beverages. Essentially the mouth needs to be clear of anything but saliva.)

Endo Pure Homeopathic Hormone Rejuvenating System is over 90% successful in clinical testing of 1,000 patients, before and after use.

The Endo Pure Hormone Rejuvenating products do not replace hormones, like synthetic and so-called bio-identical, or natural hormones.

All HRT shut down the body's ability to make its own hormones, homeopathics do not, they enable the body to produce its own health hormones at healthy levels; never toxic levels.

There are no toxic side effects.

They do not contain active hormones. As a result, they cannot elevate hormones to a toxic level, unlike all other natural and synthetic hormone creams.

They re-educate the body to produce hormones in MEN and WOMEN, including women with complete hysterectomies.

These products are Doctor recommended and have been clinically tested on thousands of patients; real patients with multiple health issues. Under professional care, these patients were monitored before and after using Endo Pure.

They have been used effectively to support the health of those with Cancer, chronic fatigue, fibromyalgia, including all the known symptoms of hormonal imbalances.

They have proven successful in re-educating the body to produce its own hormones.

FDA registered

They are Homeopathic: Non-Toxic, no side effects and cannot over-stimulate or replace hormones.

Before and after testing shows over 90% effective in women and men.

They do not cause the body to shut down and stop

production of its own hormones like natural or synthetic hormone creams.

They not cover up symptoms that are related to virus, bacteria or infection.

Long-lasting: One bottle lasts for at least two months when taken properly. To make sure you are dosing properly find a mirror and make sure you are “dropping” 5 drops under the tongue rather that “squirting” five squirts.

These homeopathics are used for:

PMS

Menopause

Post Menopause

Complete Hysterectomy

Post pregnancy depression

Growth Problems in children

Hormonal issues in teenagers

Low Testosterone, low libido in men and women

Adrenal stress

To strengthen the body’s ability to detox

Poor Thyroid function

Hair loss

Excess weight gain

Etc.

WOMEN: Targets the hypothalamus, pituitary, adrenals, autonomic nervous system, ovaries, uterus and vaginal health affecting all hormones.

MEN: Targets hypothalamus, pituitary, adrenals, testes, prostate and autonomic nervous system.

Effectively stimulates the body to produce its own hormones.

Re-educates the body to produce testosterone (men and

women), cortisol, and DHEA.

Offers delivery of energetic information to targeted organs and glands.

Best option for treating any hormone problem.

Topical Products Include:

NuFem Progesterone

NuFem Estrogen

NuFem Testosterone

These new formulations are the exact formula that is in the Theracyl product which is being aired in an infomercial.

These formulations handle emotions, hysteria, and have LM potencies of specific remedies to go deeper into the matrix and help balance hormones on various levels never before accomplished.

They are formulated with ingredients to help fibroids and cysts (Folliculinum and Ovarinum), as well as all menopausal symptoms including adrenal cortisol using ACTH and cAMP to help the pineal produce melatonin. Also, these new NuFem formulas help with breakthrough, heavy, or long-term bleeding.

There are no known side effect for homeopathic medicine. A proving (temporary) will exhibit the same symptoms as the symptoms caused by the original substance used to make the remedy. A patient can have a homeopathic proving if the remedy is used for too long of a period of time, without giving the body a break. A one week a month break is recommended.

(Q. What is a proving?)

A. It is when your body produces symptoms in response to the product, rather than your body being relived of symptoms in response to the product.

For example. You have serious hot flashes. You take the product and

they hot flashes stop.

You take the product for 3 months without taking a break, and then the product starts to cause hot flashes instead of relieving them.

If you give the body a break from the product this will not happen. A one week break, each month, or two days a week is generally enough to keep from experiencing a temporary proving.

If you do experience a proving, just stop taking the product for awhile and then try again.)

The NuFem products are in a transdermal liposome base.

Findings from the Women's Health Initiative Memory Study (WHIMS) published in the May 28, 2003 issue of the Journal of the American Medical Association have revealed yet another downside to combination hormone replacement therapy (HRT) in postmenopausal women. Researchers from Wake Forest University Baptist Medical Center found that the combination of estrogen plus progestin is associated with double the rate of dementia in women sixty-five years of age and older who took the hormones for an average of four years compared to those not on HRT. Four thousand five hundred thirty-two women took part in this sub-study of the Women's Health Initiative, which was halted last year when it was discovered that combination hormone replacement therapy was associated with an increased risk of cardiovascular disease, stroke and breast cancer. At the time that these findings were published, data on dementia risk had not yet been calculated.

Progesterone toxicity Symptoms (from oral or cream preparations):

Weight Gain

Hair Loss

Loss of Libido

Depression
Endocrine dysfunction
Dementia

Estradiol Toxicity Symptoms:

Ovarian Problems (tumors, etc.)
Breast Lumps - uterus problems
Cancer
Heart Disease
Blood clots
Depression
Weight gain
Excessive Facial Hair
Gallstone Risk
Dementia

After using NuFem and EndoPure, using the same 1000 before and after salivary tests, 100% of women with complete hysterectomies have success with NuFem and EndoPure Homeopathic Hormone Rejuvenation Program. These test results show their adrenal glands are making the needed amounts of hormones for their body, they no longer need to use ANY hormones, and 95% of their symptoms have abated.

These same tests showed that 90% of women using natural and or compounded progesterone or estrogens (for more than 3 months) from wild yam, or soy have elevated toxic levels, abnormal hormone ratios and cortisol levels and/or toxicity.

95% of women using HRT synthetic progesterone and estrogen have abnormal hormone ratios, estrogen dominance, abnormal cortisol levels and toxicity.

Synthetic, natural and bio-identical compounded HRT cause many problems: 100% of women on synthetic hormones

risk cancer. Toxic levels of synthetic hormones may take longer to indicate in serum and saliva.

The body shuts down production of its own natural hormones, causing dependence on the replacement hormones and aging the body. The toxicity burdens the entire body, including the liver, kidneys, blood and the immune system.

1000 Saliva Tests Before and After Using NuFem and EndoPure show no toxicity.

In addition to the homeopathic formulas to support estrogen, progesterone and testosterone production, there are homeopathic formulas to support all the organ systems.

These are referred to as Neuro-Emotional Remedies. Each remedy targets an organ system and the accompanying emotional challenge that generally occurs related to that organ. Below is the entire list of remedies

#1 Bladder Meridian	Irritated
#2 Gallbladder	Resentment
#3 Heart Meridian	Shock, Trauma, Guilt, Excessive Joy
#4 Kidney Meridian	Fear
#5 Large Intestines Meridian	Stuck
#6 Liver Meridian	Anger, Frustration
#7 Lung Meridian	Grief
#8 Small Intestines Meridian	Vulnerable
#9 Spleen & Pancreas Meridian	Low Self Esteem
#10 Stomach Meridian	Disgust, Despair
#11 Thyroid and Adrenal	Confusion, Paranoia
#12 Male Endocrine Meridian	Unresponsive
#13 Female Endocrine Meridian	Unresponsive
